

## Survey Results

### Do you have a specific private credit allocation?

### Do you employ a dedicated private credit consultant?

The latest Eye on Private Credit survey results reveal that 83% of investors have a specific private credit allocation while 17% do not have a private credit allocation. These results point to private credit becoming a core investment in many portfolios. With the size of the market and the ability to capture additional yield premiums, we believe private credit has earned its dedicated piece of the investment allocation pie.

When asked if they employ a dedicated private credit consultant, 17% said they do, 66% said they do not and 17% are open to considering one in the future. As the asset class evolves, this is an area to observe. With expanded allocations comes more complexity in terms of size, number of investments as well as new investment strategies to consider.
